- DHS/CBP, BP Chula Vista Exit Gate Removal & Installation, Emergency repairs, AT/FP

US Dept of Homeland Security/CBP/BPAM, Arizona Sector

- Ajo BP Station, Douglas BP Station, Naco BP Station, and Tucson BP Station, 65K S.F Detainee cell floor & wall coatings installed epoxy polymer systems provided safe working conditions with anti-microbial and anti-bacterial surfaces.

US Air Force, US Space Force & US Navy

- USAF--Joint Strike Force, F-16 & F-22, Hangar Floors 500K sf Polymer Flooring
- USAF--90K sf Electrostatic Dissipative Flooring 412th Test Wing Civil Eng Div/CEOHS
- USAF--Bldg #369 Polymer Floor Coatings/VCT/Carpet Flooring
- US Navy--NASNI CMU Wall Sealant, 6K sf wall coatings, North Island, San Diego
- US Navy--NASNI Sealcoat asphalt parking area, 11K sf, asphalt sealant, San Diego
- USSF-- Vandenberg SFB Repair/Install Cool Roof Membrane 16K sf- Building 23229, Bishop Tracking Station
- USAF-- MacDill AFB Repair/Overlay Roof Project 37K sf-Building 3070

Los Angeles County Sheriff's Department, San Luis Obispo Housing Authority

- 100K SF Roof restoration system over cap sheet IPP cool roof reflective seamless membrane
- Ardilla Lane Project--Gravel built up roof restoration project with IPP cool roof technology system

ACS uses cool roof technology roofing systems that meet the Federal Acquisition Regulation (FAR) sustainability requirements. The system provides a new roof membrane and seals the existing roof. This system provides a membrane up to three times thicker than standard membranes. Cost savings can be a third of the cost of a new roof replacement, with minimal to no impact to the environment.

***“ACS safely and responsibly assisted removing more than 3 tons of lead base hazardous material (off base), in accordance with applicable Federal State, County and local laws.”
-Arcadio Garcia, Builder Senior Chief, United States Navy, Edwards Air Force Base***

Executive Orders; 14005, 14008, and 14057

Sustainability Goals set for Federal Agencies-- ACS Inc., works with manufactures to provide products to help meet these goals. Energy Conservation, Cost Savings, Waste Reduction, Heat Island Effect Reduction, No/Low VOC's, and Co2 Reduction
